

**Position Announcement:**  
**Chemistry, Biology and Biochemistry Teachers**  
BASIS Scottsdale School

Description:

BASIS Schools Inc., has been operating in Arizona for over twelve years and has established three nationally recognized charter schools in Scottsdale , Tucson and Oro Valley , Arizona. Our organization is known for its dedication to excellence and pursuit of an atypical curriculum, stressing the importance of beginning rigorous education at a young age. Starting in sixth grade the students begin taking chemistry, physics, and biology as separate classes and perform tasks usually associated with high school courses. The Upper School is AP intensive and students are required to take at least six AP examinations in order to graduate. Due to our high standards, we attract students who are both hard working and compelled to learn, leading to an environment where intellectual challenges are met with excitement. Our students tackle high level material with zeal, which gives the instructor freedom to delve into the real mysteries of science.

Qualifications:

Applicants should have at least a B.A./B.S. in Biology, Chemistry or a closely related field and should be interested in working with motivated youth. Prior teaching experience, including tutoring and outreach programs, is desirable but is not required. Laboratory experience is also important and will be considered during review of the application. Above all we seek a person who can bring energy to the classroom and is effective at transferring complex scientific phenomena into language the students can understand.

If you would like to apply for the position, please email your resume to [pmorrissey@basisscottsdale.org](mailto:pmorrissey@basisscottsdale.org) as soon as possible.

Mr. Paul Morrissey  
Upper School Director
