

October 28-30, 2011  
at the Woods Hole Oceanographic  
Institution, Woods Hole, MA

MIT's Program in Atmospheres, Oceans and Climate  
is pleased to announce a special opportunity for undergraduate  
students to attend the 5<sup>th</sup> Graduate Climate Conference

The goal of the Graduate Climate Conference (GCC) is to provide a discussion forum for graduate students undertaking research on climate and climate change in an array of disciplines, including atmospheric, biological, earth and ocean sciences. The format of the GCC is designed to encourage new climate scientists to become acquainted with the details of diverse areas of climate research. This year, we are inviting undergraduate students to attend our conference and see what sort of research climate science graduate students do. We hope to spur a strong interest in the exciting and complex challenges that climate science offers.

No presentation is expected, undergraduate students will simply attend all oral and poster sessions over the weekend. All travel, room & board, and conference fees will be covered by our generous sponsors.

#### Applicant Requirements:

- Undergraduate student in Mathematics, Physics, or Earth Science at a university in MA, RI, NH, or ME
- Age 21+ at time of conference

Application Deadline: July 1, 2011

Visit the GCC website for the application and more information:
